QUIZ: CAN YOU SPOT THE PHISH? ANSWERS REVEALED

FAKE!

01 | HR UPDATE

Did you notice the spelling error in the domain? Instead of @apexcomputing.co.uk they threat actors have used @apexcompaning.co.uk.

FAKE!

02 | VERIFICATION

Did you notice the unusual domain and the urgency of the email? www.securelogin-amazon.com is not a legitimate Amazon domain, and the email is suggesting that the "customer" is missing out on Prime benefits by not verifying their account.

FAKE!

03 | PASSWORDS

Did you notice the fake email address? @amazon-security.com is not a real email address. The urgency of the email and scare tactics used make the user think someone is hacking into their account by requesting a new password and to reset it to stop someone malicious changing it first.

REAL!

04 | UPDATE DETAILS

Did you notice any errors? Good - because there isn't any! The URL is legitimate and there is no scare tactics used.

SCORE YOURSELF:

4/4 - Cyber Ninja!
2/3 - Training Needed!

3/4 - Phish Whispered
<2/4 - Call Apex Immediately!
